THE COMPANY

SHAD ENGINEERED FOR RIDING

NAD, founded in 1973 and owner of the SHAD brand, is a leading OEM manufacturer of motorcycle seats and cases for all major motorcycle brands. With over 50 years of history, NAD continues to reaffirm its commitment to innovation.

Engineering and design have always been our trademarks. That is the only way we can continue to provide new solutions and bring them to more than 80 countries.

We face new challenges every year, and 2025 will be no less challenging. After the worldwide success of SHAD's launch of the SH38X Expandable side case in 2024, we continue to work to offer technologically advanced products that satisfy the needs of a constantly evolving market.

Our strategic approach is a unique blend of engineering and design. We kick off the development process of SHAD products by analyzing market trends and basing them on the needs of our customers. But it's our design process that truly sets us apart, infusing our products with creativity and inspiration. Our creation process is finalized after an exhaustive period of numerous laboratory tests and prototypes, ensuring that our products are not only functional but also aestheticians.

Bringing together design and engineering, coupled with 50 years of experience in the sector, has allowed us to:

- Create innovative SHAD products for the leading brands in the industry.
- Obtain a set of patented products to differentiate us from the rest technically.
- Win prestigious international design awards.
- Distribute our product to more than 80 countries.

- Participate in exhibitions and fairs in the five continents.
 - Be sponsors of the Superbikes World Championship.
 - Develop new lines of business such as SHAD Bikes.
- For NAD-SHAD, innovation is not just a way of life, it's a commitment we maintain. This dedication to pushing the boundaries of what's possible in our industry ensures that we will continue to lead and inspire in the future.

QUALITY CASES LAB

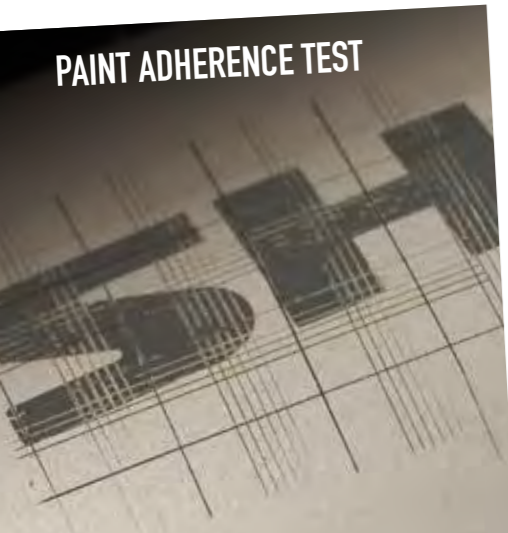

The quality of our products is based on continuous improvement, excellence in management and customer satisfaction. We test the product throughout the whole production and development process both in external and our own specialized

laboratories, guaranteeing compliance with rigorous quality standards, checking every detail, from the raw material to the final product to be delivered to the customer.

INSPIRATION

TENSEGRITY is a form of construction that uses rigid elements interconnected by tensioned cables or ropes to create strong, flexible, and adaptable structures. It is used in structural engineering, architecture, and mechanical systems design. In nature we find it in the human body within the bone structure, the muscular system, the connective tissue, as well as spider webs, bird nests and fern leaves.

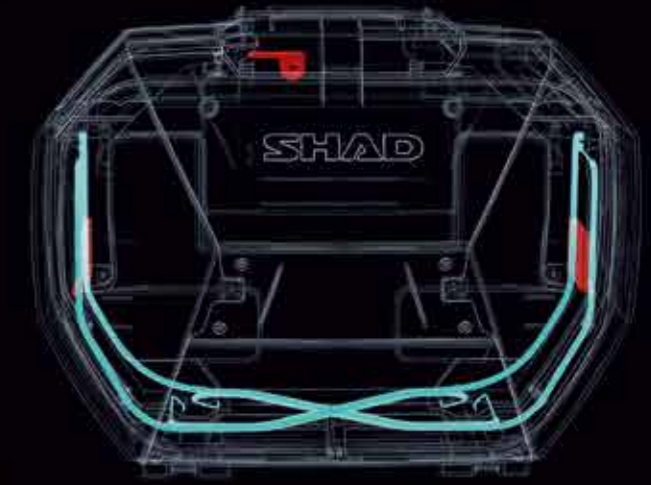

DESIGN PROCESS

SH38X / EXPANDABLE

HOW IT WORKS

To allow a smooth and uniform expansion, SHAD developed a tension cable system with 4 incorporated guides inside of the case's frame. Creating **DYNAMIC TENSEGRITY**.
